Subject: Suicide Case - Redding

Hi [REDACTED],
[REDACTED] and I looked at the car seat and samples were collected for elemental analysis. We do have some concerns regarding the evidence and the actions that took place on this evidence prior to coming to the Laboratory. Can you arrange to have a meeting at the Lab with the personnel from Trumbull, Danbury, Redding and OCME that examined the car and body?

Can you also ask to have the bags that were placed on the victim's hands to be delivered to the Laboratory? Lastly, is there any way that the passenger side seat can be removed and the same area be available for us to perform a testfire on this seat to see if we have the same type of damage?

Thanks so much for your assistance,
[REDACTED]
